

The eco-clear basic service

The eco-clear complete urinal hygiene service offers you market leading, environmentally friendly products to keep your urinals fresh, clean and free-flowing.

This service regime is designed for customers who already have their own planned preventative maintenance programme for their urinal systems but wish to take advantage of our ecological solution for reducing water and chemical use.

Initial set up of the eco-clear service to include:

- Trap and pipework clear, full deep clean of the urinal bowls, traps and pipes, floor and walls next to the urinals
- Supply and installation of the eco-clear water management system
- Replacement of the current waste outlet and installation of the eco-clear sleeve with its patented odour lock design
- Test of cistern, water pressure, flushing operation and bowl spreaders
- Supply of cleaning solution for daily use

The eco-clear basic service regime

Conducted at regular intervals and will involve the following:
