

## The eco-clear deep clean and full service

### Initial set up of the eco-clear service to include:

- Traps and pipework removed and cleared
- Full deep clean of:
  - Urinal bowl, traps and pipes
  - Surrounding floor and walls
- Supply and installation of the eco-clear water management system including solenoid valve
- Replacement of the current waste outlet
- Installation of the eco-clear sleeve with its patented odour lock design
- Test of cistern, water pressure and flushing operation
- Supply of eco-clear solution for daily use

### The eco-clear deep clean full service regime provides an unrivalled service to the customer:

- Specially trained and skilled technicians fully equipped to comprehensively maintain your urinal system
- A planned regular service programme covering the cistern and water management system, urinal bowl, traps, waste pipes, walls and floors around the urinals
- Installation, supply and on-going replacement of eco-clear's market leading, environmentally friendly products
- Free-flow promise\* – a free call-out facility to remedy urinal blockages between service visits

The service plan ensures fresh, clean, free-flowing water-saving urinals so that you can enjoy the huge benefits of eco-clear all year round.

\* Pubs and nightclubs excluded but will be provided elsewhere free of charge in the event of product failure (subject to certain exclusions including vandalism, product misuse etc. when a charge may be made)

## The eco-clear full service regime

Our trained and fully equipped service technicians visit your premises every three months to check your urinal system and replace sleeves to ensure your urinals stay fresh, clean and free-flowing.
