

## Saving water and money with eco-clear...

Urinals waste huge amounts of water and money. A standard urinal system with a 9 litre cistern supplying 2-3 urinal bowls with no flush control will typically flush every 15 minutes, which equates to around 100 times per day and 35,000 times per year. This will use 315<sup>1</sup> cubic metres of water per year and, depending on your water authority, could be costing your business around £760 annually<sup>2</sup>.

Reducing water in a traditional, constantly flushing urinal causes blockages and odour problems, leading to an increase in maintenance and operating costs.

Enviro-Fresh's environmentally friendly, water saving urinal system – **eco-clear**, solves these problems by allowing urinal flushing to be reduced to, on average, 8 times per day without the adverse side effects of increased blockages and bad odours.

Regional Water Authority	Charge for water and sewerage per cubic metre (m <sup>3</sup> )	Cost of constantly flushing cistern	Cost of cistern flushing 8 times per day	ANNUAL SAVING
Anglian Water <sup>3</sup>	£2.34	£738	£61	£677
Dwr Cymru (Welsh Water)	£2.71	£855	£71	£785
Northumbrian	£1.74	£548	£45	£503
Severn Trent	£2.03	£640	£53	£587
South West	£4.23	£1,332	£110	£1,222
Southern	£2.42	£761	£63	£698
Thames	£1.59	£501	£41	£460
